PRESS RELEASE

FOR IMMEDIATE RELEASE

More VA Hospitals Choose DISCO™- Digital Secure Copy to eliminate paper based Release of Information!

July 2010 – Santa Cruz, CA

The VA West Palm Beach, FL has joined others, in the VA Healthcare System, by choosing DISCO™- Digital Secure Copy for automated and encrypted Release of Information on CD.

“We are very pleased that more VA hospitals will implement DISCO™ for digital Release of Information”, says Nancy Fisher, President and CEO of Data Distributing. “These hospitals process a very large amount of paper ROIs and want to dramatically reduce the cost of paper, toner, copier expense and manual operations, while protecting the privacy and integrity of patient information with encryption. DISCO™ was customized to work with VISTA and automatically create copies on CD, thermally print the labels and encrypt the patient information. DISCO™ can help the VA satisfy new HITECH ACT requirements as well as energy saving and green technology recommendations”.

About DISCO™

DISCO™ is an intelligent, digital (ROI) chart copy solution that produces patient record copies on disc for medical records departments whether they are EMR-based, paper-based, or a hybrid of both. DISCO™ performs HL7 queries and retrieves patient information from the HIS or EMR, creating on-demand digital copies of either full charts or specific encounters, and burns the patient data to a Rimage Disc Publishing system. Unique software also protects the security of the data. Additionally, DISCO™ indelibly prints the appropriate patient data directly on the CD for easy identification and quick distribution, eliminating the risk of errors and mislabelings.
